Renewal of Factory Registration

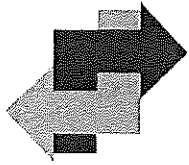

Your payment of the Factory Registration (“FR”) fee has been received and your FR with the Trade and Industry Department (“Department”) has been renewed. The validity period is from 06/01/2024 until 05/01/2025.

2. The renewal and continuation of the FR are conditional upon your compliance with the conditions of registration. The Department reserves the right to cancel the FR without refund of any registration fee paid in case of failure by the registered factory to comply with any condition of registration or breach of undertaking. Please refer to the letter of Approval of Factory Registration for details.

3. Please also note that the FR system is maintained by the Department for the purpose of origin certification. Approval of an FR application and renewal of registration do not imply the registered factory’s compliance with other statutory requirements as well as regulatory requirements administered by other government departments in relation to the factory’s operation and products. It is the registered factory’s responsibility to ensure compliance with such requirements.
